

The diagram illustrates the experimental setup. A participant (P) is seated at a desk, interacting with a computer (C) using a keyboard and mouse. The computer is connected to a video camera (V) and a video monitor (M). The video camera is positioned to capture the participant's actions, and the video monitor displays the feedback. The participant is also connected to a video camera (V) and a video monitor (M) via a video camera (V) and a video monitor (M). The participant is also connected to a video camera (V) and a video monitor (M) via a video camera (V) and a video monitor (M).
